OBJECTIVE

I am seeking a Java Back-end Developer job to apply my Java and Spring framework knowledge. I aim to contribute meaningfully to projects, gaining hands-on experience in the software development lifecycle. This job will be a stepping stone to becoming a proficient Java Backend Developer within two years and a seasoned Java Web Application Developer in five.

SKILLS

Technical skills

- Language and framework: Java (Spring Boot), JavaScript (React Native), HTML and CSS, C# (Visual Studio)
- Analysis and design database (MySQL)
- App development using the Google Firebase for authentication
- Develop Restful API app service with Spring Boot
- Develop mobile applications with React Native
- Apply Google Cloud Services to projects (Vertex AI, Google Gemini, Google Cloud Storage, Google Cloud APIs)
- Apply GitHub to manage project versions

Soft skills

- Team collaboration and time management
- Research skills
- Logical reasoning and problem-solving abilities
- Using Microsoft Office

EDUCATION

Eastern International University [October 2020 – Present]

School of Information Technology

Major: Software Engineering

Key Subjects: Object-oriented programming, Database, Data structures and algorithms, and Mobile Programming

GPA: 3.01/4

PROJECTS EXPERIENCE

Project Title: **The Mujick** (team size: 1 person)

Dates: April – June 2024

Description: A streaming music platform with custom playlists for each user and various songs in the library that allow customers to organize their songs by artist, album, or genre

Role: Full stack developer

Technology: Java Spring Boot (Back-end server), React Native, MySQL, Android Studio, and GitHub

Results: A music application with convenient features and various playlists

https://github.com/thanhtai303/mobile-programing.git

Project Title: **IELTS - Supporter** (team size: 3 people)

Dates: April – September 2024

Description: A multi-platform project (web and mobile application) helps students practice and prepare for IELTS exams in four sections (Listening, Reading, Writing, and Speaking). Implementation of OpenAI (Google Gemini) in Writing and Speaking sections for automatic scoring and providing sample answers

Role: Back-end developer

Technology: Java Spring Boot, MySQL, GitHub, Google Cloud Service, Google Gemini, ReactJS and React Native

Results: A multi-platform application with various Cambridge standard mock tests in four sections

https://github.com/thanhtai303/ielts-supporter.git

Project Title:	**Edit And Download Image Website** (team size: 2 people)
Dates:	August 2024
Description:	A website allows people to type names, roles, and messages, then it will enable people to download edited image that contains their name, role, and message
Role:	Full stack developer
Technology:	JavaScript, HTML, CSS, Image Cropper, JQuery, and Public Hosting
Results:	A website for the Ho Chi Minh Communist Youth Union in Binh Duong, used by over 2000 people https://daihoilienhiepthanhnienbinhduong.id.vn
